1 M.S.A. department III, No. 1066. There is a note on the original that this listing dates from 1806, but this is a mistake; it should be assumed that these armies and corps were drawn up in early August and September 1805 (A.C.W.M. classified department, 1805, minute No. 14; M.S.A. department II, No. 1551, log of Count Lieven's despatches).

2 This army included: two colonels as brigade majors; one general, three field officers and five subalterns from the Quartermaster's Department; one general, two field officers and four subalterns from the Engineers; two medical officers... The excess baggage was left in Ostrog, Zaslavl and Rovne.

The breakdown by troop type was as follows:

	Men
40 squadrons of cavalry	5,675
Six regiments of Cossacks	3,300
48 battalions of infantry	31,178
Six battalions of jägers	2,503
Three battalions of artillery	2,091

The division of the Army of Podolia into six columns:³

	Squadrons	<i>Sotnia</i>	Battalions	Companies	Guns
1st Column - commanded by Major General Prince Bagration

Malorussia Grenadiers			3

1 st Horse Artillery Battalion					6

3 In the appendix March Route From Radziwiłłów Across The Border, the columns were to proceed by 22 stages with seven rest days via Brody, Lemberg [Lviv] and Bialo [Bielsko-Biała]; the columns were to set off one after the other every two days, thus the 1st would depart Brody on 13 [25] August, the 2nd on 15 [27] August, and so on, and would arrive in Bialo on 10, 12, 14, 16, 18 and 20 September [22, 24, 26, 28, 30 September and 2 October].

Note: this schedule for the columns was checked against the Log of Directed Decrees and Announced Orders (M.S.A. department I, No. 244), the similarity is total, and this allows us to conclude that the issued schedule of armies and corps, in all probability, was quite suitable for the actual distribution of troops in its other parts. But it is difficult to determine the exact date of this listing.

15 M.S.A. department II, No. 1556(A). Note: in this same archive, department III, No. 380 (and chart in department III, No. 371) there is a return for temporary quartering assigned to regiments to bring them closer to the borders in June 1805, which also shows a draft schedule and differs somewhat from that given in this Appendix. This return refers to: First, Second and Third armies, Army of the North, Reserve corps facing Moldavia and Prussia, and the Landing Corps.

16 The given schedule probably represents only a draft, which is particularly evident from the figures for the forces in the Ionian Islands (see Part 28i). The Army of Podolia (General-of-Infantry Golenishchev-Kutuzov) was broken down into six columns, yet is immediately depicted consisting of three corps. The numbers are also only approximate values, since, for example, Cossack regiments were to set out on campaign consisting of 578 men, but here only 500 men are calculated. Without going into a detailed analysis of this listing, let us say that the original comprises several merged documents written in a variety of different hands, there are quite a few crossings out, but it is still possible to consider this projection as a supplement to the listing in Appendix 1 to Part 28e and, in part, even as a subsequent development of this listing.

A half-company of pontoniers	116
